Atomic Bomb Digital Art Project

Assignment Objective and Requirements: The goal of this project is to allow you to express your attitude and emotions about the bomb in an artistic way! Read the article "Pop Psychosis: the Influence of the Bomb on Superflat Art" and answer the questions. Using a paint program or Google Sketch Up, you will mimic the style of artist Murakami Takashi and digitally render your own representation of atomic bomb blasts over Hiroshima and Nagasaki. The art can be a collage of Japanese anime art clipped and pieced together using Gimp OR your own completely original art! If you import a 3d model of your artwork into Google Earth over the cities of Hiroshima or Nagasaki, you will receive extra credit!
