

# Create an animated map of the spread of the Black Death (1346-1353) in PowerPoint!

- Directions:** Using PowerPoint and its animation features, you will animate the spread of the Black Death across a medieval map of Europe from 1346-1353! You can either animate the spread using arrows from one location to the next or animate waves of the plague, like ripples of water across the surface! For each location or successive wave, you must attach hyperlinks to other slides in the presentation, containing short descriptions and historical images of the plague's effects in those particular areas of Europe! Your PowerPoint will most likely amount to 8-10 slides!
